

# School Safety Threat Detector

*Powered by Kognition*

Turn your school's video cameras into **a powerful, early warning system.**

Your video cameras capture a lot of information. But are they aware? Can they analyze what they see, identify potential dangers and take appropriate action? The answer is yes, with Kidio Threat Detector. Think of Threat Detector as an ever-present eye, watching 24/7. It's powerful software technology that can detect weapons, spot fights or other unusual activity and send alerts with video clips to the school safety officer, and if necessary, local law enforcement. Threat Detector also has the capability to generate daily threat reports on demand and uses cloud storage to securely store your video records. Transform your existing video camera system from passive to active security, with Threat Detector.

## FEATURES

- Weapons detection
- Real-time alerts with video clips
- Optional connectivity to local law enforcement
- Daily threat reports
- Cloud-based storage

## BENEFITS

- Advanced early warning
- Proactive, real-time response
- Preempt incidents before damage can occur
- Decrease incident response time
- Identify incident locations instantly

## TECHNOLOGY REQUIREMENTS

- HD IP video cameras with microphone and RTSP support
- 3-5 Mbps Internet connectivity (per camera)

**Schedule a demo at [Kid.io](https://www.kid.io) or call 813.649.8028**

**KOGNITION** designs, builds and deploys SmartProperty management solutions that transform commercial properties and smart devices into cognitive, automated systems with advanced safety, security and control made possible by Kognition's proprietary patent-pending software, third party information and cloud-based solution.
